

Advancing Compassionate Care Across Our Network

At Vivant Health, we are proud of the ways our network comes together to advance compassionate, whole-person care for our communities. Our purpose is clear: to address not only medical needs but also the social and community factors that shape health, a mission made stronger through partnership with providers like you.

We recognize that this is an uncertain time for Medicaid, and navigating benefits can be challenging for the vulnerable populations who rely on it. Through our CalAIM programs, we are committed to providing education and support so patients understand their benefits, know how to use them, and maintain access to care.

Enhanced Care Management (ECM) and Community Supports (CS) are essential to this work. Many of our partners have built strong ECM programs, and by aligning efforts and sharing best practices, we can expand population health insights, coordinate services more effectively, and ensure care remains seamless, comprehensive, and compassionate.

As we move forward, we will continue to listen, align, and elevate partner voices so the people we serve remain at the center of every decision. Together, we can advance compassion, equity, and hope across our communities.

With appreciation for all you do,

Sean Atha, Sr. Vice President, CalAIM Initiatives and Community Health Integration
